

Full Stack Developer in Saint-Petersburg

We are **innoscripta**, an innovative company from **Munich, Germany**. We scout bright ideas and transform them into high-end projects. We look for scientific breakthroughs and help them turn into reality. We are entrepreneurs with passion for science and modern technologies.

Our core business model can be briefly described as follows: we connect researchers from scientific communities all over Germany with those companies and enterprises, that are in need of cost-saving modern technologies. **Since 2012** we have completed **more than 2000 projects** in various areas of interest and expanded from 1-person company to a full-scale innovative machine with more than **200 employees**, including **50 developers**.

Our plans:

Recently we have launched our own IT-department, and now we are investing many efforts into development of our own IT-products. Our flagship projects include:

- multi-module CRM system
- platform for sales management
- platform for scientific project management

We are looking for open-minded and passionate people (with various experience or qualification), who are willing to invest their efforts into professional and personal development.

Our Frontend:

- JavaScript
- React/ Redux
- HTML
- CSS

Our Backend:

- PHP
- Laravel
- MySQL

Other technologies:

Docker, Kubernetes, Gitlab, CI/CD

English language skills:

Professional working proficiency

Even if your stack is not a complete match, do not hesitate to contact us.
